PROFESSIONAL SUMMARY

Full Stack .NET Developer with nearly 3 years of experience designing and delivering enterprise web applications, REST APIs, mobile apps, and IoT integrated solutions using ASP.NET Core, Angular, Flutter, SQL Server, and Azure. Proven track record building asset management systems, RFID integrations, AI powered enterprise assistants, and large scale event technology platforms for international clients. Focused on writing scalable, secure, high performance code and translating business requirements into reliable production systems.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Dart, Python, HTML, (S)CSS, JSON

Frameworks & Libraries: ASP.NET Core, ASP.NET MVC, Blazor, Angular, Flutter, Bootstrap, jQuery, Chart.js

Databases: MS SQL Server, MySQL, PostgreSQL, SQLite, MongoDB

Cloud & DevOps: Microsoft Azure (App Services, Storage, Monitoring), CI/CD, Azure DevOps, Azure Repos, GitHub Actions, Docker, Secret Management

AI & Intelligent Systems: Azure AI Foundry, OpenAI, LLMs, RAG, Prompt Engineering, Semantic Search, Vector-Based Knowledge Retrieval, AI Workflow Automation

Tools & Platforms: Git, GitHub, GitLab, Docker, RabbitMQ, Firebase, Visual Studio, VS Code, Android Studio, Postman, Swagger, Trello

Design & Prototyping: Figma, Photoshop, draw.io / System Diagrams

Concepts: MVC Architecture, RESTful APIs, IoT & Device Integration, SDLC, Agile/Scrum, Database Design & Normalization

WORK EXPERIENCE

.NET Software Engineer | Infome Technologies LLC | Kochi, India **Feb 2025 – Present**

Full-Stack .NET Developer building scalable backend services, cross-platform applications, and AI-powered solutions for enterprise asset management, IoT, and event-technology platforms.

- **Engineered** secure REST APIs with ASP.NET Core (5/8/9/10) Web API powering enterprise asset management, AI, and event management platforms in production.
- **Built** and maintained Angular front end modules integrated with .NET Core REST APIs, delivering responsive, data driven enterprise dashboards.
- **Established** Clean Architecture, the Repository Pattern, Docker, and Azure DevOps CI/CD pipelines, automating deployments for ASP.NET Core and Angular applications.
- **Optimized** data storage and queries across SQL Server, PostgreSQL, SQLite, and MongoDB to support structured and unstructured data across multiple enterprise applications.
- **Developed** cross platform Flutter and .NET desktop applications for Windows and Android, including an Avalonia UI based ID card and badge design and bulk printing tool (InfoID).
- **Implemented** AI powered features using Google Gemini AI, LLMs, and Retrieval Augmented Generation (RAG) to automate information retrieval and improve business productivity.
- **Integrated** RFID devices, QR scanners, IoT hardware, and .NET Worker Services to enable real time asset and event tracking.
- **Secured** REST APIs across multiple projects by implementing JWT and OAuth based authentication/authorization with role based access control (RBAC).
- **Collaborated** with cross functional teams in an Agile/Scrum environment sprint planning, daily stand ups, and code reviews covering architecture, cloud deployment, AI integration, API documentation, and monitoring.
- **Maintained** version control and collaborative development workflows using Git across all projects.

ASP.NET Core Full Stack Developer (Intern) | Aitrich Technologies Pvt Ltd | Thrissur, India **Dec 2023 – 2025**

- **Contributed** to the development of an ASP.NET Core Job Portal application using C#, SQL Server, HTML, CSS, and JavaScript.
- **Participated** in Agile sprint planning, daily stand ups, testing, deployment, and SDLC activities to deliver project milestones on schedule.
- **Implemented** backend modules and collaborated on code reviews and Git based version control to maintain code quality.

ASP.NET Core Full Stack Developer (Freelance) | Independent / Saudi Arabian Clients | Remote **Nov 2024 – 2025**

- **Delivered** custom ASP.NET Core web applications and REST APIs for Saudi Arabian clients, meeting diverse business requirements.
- **Designed** automated PDF reporting solutions using FastReport Community Edition, reducing manual report generation.
- **Configured** and maintained IIS hosted ASP.NET Core applications for reliable production deployments.
- **Designed** and optimized MySQL databases to support efficient data storage and query performance.
- **Validated** REST APIs using Postman to ensure functionality, performance, and data integrity before deployment.

KEY PROJECTS

► Smart Asset Management System (SAMS) – InfoAsset

Enterprise grade asset management system tracking organizational assets across multiple companies, departments, locations, and users, providing centralized control over the full asset lifecycle.

Technologies: *ASP.NET Core Web API, Angular, SQL Server, PostgreSQL, EF Core, JWT/OAuth, Gemini AI, LLMs, RAG, RFID, DevOps*

Live Site: *View Live →*

- **Designed** scalable ASP.NET Core Web APIs and backend architecture covering asset registration, assignment, tracking, maintenance, audit history, reporting, and notifications.
- **Built** secure JWT based authorization, RBAC, and a multi tenant subscription architecture supporting multiple organizations on a single platform.
- **Developed** Angular dashboards with real time asset visibility, location tracking, utilization monitoring, and operational analytics.
- **Improved** asset retrieval and reporting performance by approximately 30% through SQL Server indexing and stored procedure optimization.
- **Automated** monitoring and physical asset identification via background services, scheduled jobs, and RFID based tracking.
- **Integrated** an AI powered enterprise assistant using Gemini AI, LLMs, and RAG, with prompt engineering, conversation history, permission aware responses, and contextual asset insights.
- **Reduced** manual processes and reporting errors by approximately 40% through automation and centralized management.

► Desktop ID Card & Badge Designer with Bulk Printing – InfoID

Technologies: *C#, .NET, Avalonia UI, MVVM, SQLite, JSON*

Product Page: *View Live →*

- **Built** a desktop ID card and badge design application with customizable templates and reusable design elements.
- **Implemented** canvas based design tools: shapes, images, text, layers, rulers, guides, grid, snapping, and alignment.
- **Developed** bulk ID card generation and printing workflows to efficiently produce personalized cards from stored data.
- **Added** SQLite/JSON based design persistence with autosave, undo/redo, and customizable fonts and colors.

► Event Check-In & QR Scanning Application – InfoEventz

Technologies: *Flutter, REST APIs, QR Scanning*

- **Developed** a high performance Flutter application for real time QR code scanning and instant attendee verification.
- **Integrated** secure backend APIs for participant validation and real time data synchronization.
- **Scaled** the application to handle thousands of attendee entries with minimal latency, deployed for Netflix promotional events in Saudi Arabia, including the Wednesday Season 2 and Stranger Things Season 5 launches.

► Future Investment Initiative (FII) Guest Entry & UHF RFID Monitoring System – InfoEventz

Enterprise event entry management and UHF RFID monitoring system deployed at the FII Global Investment Conference in Riyadh, Saudi Arabia.

Technologies: *Flutter, .NET Worker Services, UHF RFID Integration, .NET MAUI Blazor Hybrid*

- **Built** a Flutter based multi zone event entry application supporting QR code scanning and real time check-in/check-out tracking.
- **Implemented** UHF RFID badge detection using .NET Worker Services to monitor attendee movement and support event security.
- **Developed** a .NET MAUI Blazor Hybrid monitoring interface to track RFID tag reads and manage multiple gate devices with real-time synchronization.

► RFID Anti-Theft Integration – InfoBookz Library Management System

Technologies: *.NET Core, RFID Integration*

- **Integrated** RFID detection devices with the library management system through secure backend APIs to enable automated inventory monitoring.
- **Implemented** real time validation logic to detect un-checked-out books passing through RFID security gates.
- **Developed** visual alert and alarm mechanisms for unauthorized book movement, reducing manual security checks.

► Invoice Management & PDF Generation Application – InfoPos

Technologies: *Flutter, PDF Generation*

- **Built** a Flutter based mobile application for creating and managing invoices through user friendly input forms.
- **Implemented** automatic VAT calculations and dynamic invoice generation for accurate billing.
- **Developed** functionality to generate, preview, and export invoices as PDFs for sharing and record keeping.

EDUCATION

Bachelor of Computer Applications (BCA) — Bharathidasan University (BDU) **Jul 2023 – 2026**

ASP.NET Core Full Stack Web Development — Aitrich Technologies **Dec 2023 – 2025**

CERTIFICATIONS

- **Microsoft Azure Essentials Professional Certificate** — Microsoft & LinkedIn Learning (2026): Azure fundamentals, cloud computing concepts, services, deployment, security, storage, networking, and best practices. View Credential →
- **AI Agents Intensive Course** — Google, Kaggle Learn (2026): AI agent architectures, Gemini based agent development, tool integration, and multi agent systems. View Credential →
- **System Analyst Certification** (2024): Business process analysis and effective IT solution design.
- **ASP.NET Core Developer Certification** (2024): Building, deploying, and managing applications using ASP.NET Core and modern development practices.
